

Object: hd191201_E_1308737pn_rn.s

Teff1 = 18000 K, logg1 = 4.00, vsini1 = 50 km/s, vrad1 = -30 km/s

Teff2 = 17000 K, logg2 = 3.50, vsini2 = 50 km/s, vrad2 = 30 km/s

R2/R1 = 1.3

This object has a total of 2 observations: hd191201_E_1308737pn_rn.s and hd191201_E_1720107pnm_rn.s

Notes: The spectrum panel shows variations on both the He lines and Balmer series from observation to observation.

Since these variations show significant radial velocity shifts, these variations are more likely

to be from a binary system rather than pulsations.

We provide a binary model with two O stars, parameters listed above.
